

Where Great Floors Begin

Certified Collection Partner

MC FLOORING – SHAWNEE MISSION, KANSAS

Shaw Industries certifies that this company is actively collecting post-consumer carpets that will be recycled into the building block of new nylon fiber. Shaw recycles these used carpets in a patented process that supplies new fiber content for Shaw's nylon carpets.

Together, our efforts result in diverting hundreds of millions of pounds of carpet from landfills annually. This program represents the most significant contribution to C.A.R.E.'S goal of a 40% reduction of carpet to landfills by 2012.

I want a floor that helps to save enough oil to produce millions of gallons of gasoline annually.

EXPIRES: JANUARY 19th, 2013

Green. It's something we never forget.

That's the **Shaw Green Edge I™**
